Stephen Gakenheimer
*Deputy Superintendent of
Highways*

July 8, 2015

To whom it may concern,

On July 6 and 7, 2015 the Town of Saugerties Highway Department contracted with your firm to mill and contour 6 roads slated for remediation. The machine was delivered prior to the start date so work could begin at 6:30 am when the trucks arrived to transport the millings offsite.

Monday July 6 and Tuesday July 7 the milling machine was in place on the road and ready to begin work precisely at my requested starting time. Accompanying the milling machine were Peckham Industries employees Scott Lindsay, Ben Birch and John Lewis. These operators and ground technicians worked non-stop for two solid days. The final road was a very difficult profiling task requiring different angles to accomplish proper drainage. Your crew effortlessly transformed this difficult task into a very smooth and easy procedure making me realize ... My time would have been much more productive worrying about something else!!

As Superintendent of Highways for the Town of Saugerties, I hereby request that employees Scott Lindsay, Ben Birch and John Lewis be recognized for their no nonsense professional approach to their tasks accompanied by their friendly and cordial personalities . They are a true asset to Peckham Industries.

If you have any questions or comments pertaining to this matter please don't hesitate to contact me.

Sincerely,

Douglas F. Myer
Superintendent of Highways
